

Inventors Council

OF MID-MICHIGAN

PO Box 311, Flushing, Michigan 48433

Web Site: INVENTORSCOUNCIL.ORG

The Inventors Council is an independent, non-profit 501 C-3 corporation formed to help inventors pursue their dreams of bringing new and innovative products to market. Our goal is to help fellow inventors succeed in the most efficient and least costly manner possible by providing education and business networking.

Founded by Robert (Bob) Ross in 1995

We meet monthly at Walli's Restaurant, 1341 South Center Road Burton, Michigan. Just Two blocks south of I-69, Exit 139

VOLUME SEVENTEEN

NEXT MEETING THURSDAY, July 11, 2013, 7:00PM

NUMBER SEVEN

Thursday July 11 2013 Meeting

The meeting will take place at 7:00 pm in the upstairs of Walli's Restaurant in Burton Michigan.

July Membership meeting will be a round-table review of different inventors product ideas. All are welcome to present, members and visitors.

We are all invited to bring our products for discussion and review and analysis of issues using our Invention Review Process.

We will show our experiences with all phases of taking a product to market. Real not theory, ways and results.

Come and share our knowledge and fun.

Thursday June 13, 2013 Meeting

Our Speaker for June was Ryan Grepper, Product Developer at Large.

His web site is www.inventorsblueprint.com

Ryan is out of Portland Oregon and is an author, serial inventor with many products on the market. He talked about his failures as well as his successes. He is a big proponent of licensing and discussed the pitfalls and its advantages versus forming your own company to sell and manufacture the invention yourself.

Ryan did a nice job of presenting his ideas to our inventors Thanks, Ryan.

Top 5: Fourth of July Inventions

As you know, we occasionally incorporate upcoming holidays or events into our Top 5 lists, and the 4th of July is no exception! This coming Wednesday, July 4th, the United States will be celebrating their Independence Day. As a holiday with numerous celebrated traditions, we'd like to highlight inventions that have become integral parts of Fourth of July festivities.

1) American Flag

While an official patent for the original American flag does not exist, American's are taught at a young age the story of General George Washington and the Continental Army entrusting Betsy White with sewing the first American flag. The [original flag](#) had 13 stars and 13 red and white stripes.

2) Fireworks

In 1859, Ms. B Franklin Coston was [issued a patent](#), number 037.8, for a "Method of Signaling Any Numeral or Combination of Numerals by the Display of Different Pyrotechnic Fires," or in laments terms, fireworks. While the origins of gunpowder used in fireworks date back to ancient China, modern fireworks have become synonymous with holidays such as New Year's and the Fourth of July.

3) Precision Fireworks Display

Some of you may have read Gene Quinn's article on IP-Watchdog back in 2010 on how Disney patented a [precision fireworks display](#). If you haven't, [check it out](#). It's fun to read and informative (for example, learning about how fireworks evolved from Ms. Coston's invention to the celebratory fireworks we know today).

Hints from the Fog
by Mike Ball, President

(cont. from Page 1)

4) Fireworks Launcher

Now we can't have a fireworks display without having a fireworks launcher. In addition to holding a patent for a fireworks display system, Disney also holds [a patent](#) for a "launcher for launching multiple fireworks projectiles." As a result, fireworks displays can be large and exciting, instead of being limited to launching a single firework at a time.

5) Sparklers

What's the Fourth of July without some kids running around, waving some sparklers? In 2005, Alberta, Ltd was issued a patent for a set of [alphabetical sparklers](#). This invention allows kids (and adults) to write their names in the air using a sparking wand of fire!

Other Inventions

Swim Fins

Leonardo da Vinci and Giovanni Alfonso Borelli toyed with the idea of the swim fin years before good ol' Benjamin Franklin made the first pair of flippers in 1717. Back then, Benny was but a wee Bostonian of 12 years, and he was eager to take a dip in—you guessed it!—the Charles River. He strapped two slabs of wood in the shape of art palettes to his feet and called it a day. So there you have it. Benjamin Franklin, making wannabe mer-people's dream come true since the 1700s. Whether you're at the pool or by the sea this Fourth of July, put these puppies on before you dive in and you'll be able to swim fast.

Lobster Trap

What's a Fourth of July picnic without a New England lobstaah roll? Lacking, that's what. Given that we are from the Bay State, there is no reason for us to not enjoy some good tail (of lobster, you pervs) over Independence Day Weekend, because the lobster trap was invented in Swampscott, Massachusetts back in 1808. Lobster traps, or lobster pots, are typically constructed from wood and wire and made into two parts: the "chamber" or the "kitchen," and the "parlour." But alas, despite the bougey name for these compartments, the unfortunate little crustaceans that stumble into the "chamber" will not be headed to a luxe summer mansion on the rocky coast of the Atlantic...Unless they are going to be put in boiling water first and served on some fine china with a lemon wedge. #dark, I know.

Banana Split

Ohhhh yeah. The banana split is legend in ice cream, and American, history. This epic treat was created by a 23-year old apprentice pharmacist back in 1904. A banana, vanilla, chocolate, strawberry ice cream, plus chocolate fudge, sweet strawberry topping, pineapple topping, nuts, whipped cream, and, of course, a maraschino cherry are the makings for this old school ice cream delight. Not to put a damper on the holiday fun, but here's some bad news, Bostonians. Right after the original version was made, a Boston entrepreneur whipped up his own banaynay meets ice cream design, but with a fatal flaw: he left the bananas unpeeled. Rookie mistake. Let's take this moment to appreciate how far we've come.

Invention Review Panel

For objective evaluation and priceless feedback, share your invention ideas with an educated group of inventors, business owners, engineers and authors!

Our Panel will sign a non-disclosure agreement to guarantee your ideas are kept secret while we provide you with the input needed to make decisions, no matter what stage of the invention process you're at!

There's a \$25.00 Donation for a Review. The Panel meets at 6:15pm before each meeting. Call Panel Chairman Rick Mason at 810-659-7935 for an appointment.

This is a chance for everyone to come face-to-face with other MCC members. MCC Live lunches are relaxed, casual and usually good for a few laughs. It's never a something you have to attend; it's an event you want to attend. No sixty-second commercials. No ten-minute speakers. This is just a chance to break bread together, meet new people, seek to understand their needs and connect on a new level.

Tuesday, May 28, 11:30 a.m.-1 p.m.

Tequilla Blue, 526 Main, Royal Oak
